

CSPDC Releases Regional Housing Study

The CSPDC Regional Housing Study

The Regional Housing Study is the culmination of a major collaborative effort among CSPDC staff, local governments, housing stakeholders and consultants, and includes analysis of local and regional trends as well as solutions to the unique housing supply and affordability issues that its member localities are facing.

Funded by a grant from Virginia Housing, the Study was developed by industry experts at Virginia Tech's Center for Housing Research and HousingForward Virginia. The Regional Housing Study is a detailed analysis tailored to the region and its distinct housing markets. The study team worked closely with local staff and regional stakeholders and engaged in extensive outreach to develop solutions to market challenges that align with local goals and build on existing plans and interests.
